Celebrate the Moon Landing's 50th Anniversary With Moon-Look Tile

While it's been 50 years since man brought tile to the moon, tile designs continue to reflect the textures and patterns we witnessed through the historic moon landing. Shades of gray, soft textures, and galactic patterns shine just as brightly in our homes as they do in the night sky, lighting up our interior decor with trending "moon looks."

Understanding Efflorescence (That Ugly White Powder on Your Tile)

We've all seen it: that really ugly white powder that grows on cement grout and also tile, stone, brick and concrete, particularly when it's installed someplace with moisture (i.e., in a basement or outdoors). That white residue is called efflorescence.
